one-click for Android SMS transfer may fail to meet your expectations. What to do? In this situation, you'd better opt for Dr. Fone - Phone Manager (Android SMS transfer tool is designed to meet custom transfer requirements. Just transfer only wanted messages to new Android, and leave unwanted ones on old Android. Follow the below instructions to selectively transfer SMS from Android. Follow the below instructions to select the "Phone Manager" option from the main screen. Step 2: Connect the two Android devices to your computer using the USB ports. Click on the "Information" tab. In this new screen, you can see the Contacts and SMS on the left column. Click on "SMS" to access all Android messages. Step 4: Scroll on the screen to view which messages are wanted ones on your source Android. Then select the SMS threads, click the "Export" icon on the top bar, and choose [Name of target Android]. That's all the process of selectively transferring Android messages to a new device. Pretty easy, isn't it? You may also be interested in Transfer Everything from iPhone to iPhone with/without iTunes or iCloud Part 3: How to transfer SMS from Android SMS Transfer is one of the time-honored apps that can help you. The app will first take a backup of your Android SD card, which will later be used for SMS restore. While the SMS transfer process is not as fast and direct as MobileTrans - Phone Transfer, it can meet your basic SMS transfer requirements. Here's how you can transfer SMS from Android sMS Transfer app on the source Android sMS Transfer app on the sour messages. Just enter any file name and proceed. Step 3: The app will show that the SMS backup has been taken and stored on the Android SD card. Step 4: Just safely remove the SD card that contains the Android some step 5: Launch the app once again and click on the "Restore SMS" option. Browse the backup file having your text messages and restore them to the target Android by using an SD card. Though, it will only transfer messages from Android to Android using Bluetooth While the technique is not widely recommended, you can use the native Android Bluetooth feature as well to transfer text messages from one Android devices. Also, it would take a lot of time to send your Android messages via Bluetooth. The method is also not recommended from a security perspective. If the source Android SMS transfer via Bluetooth. To start with, bring the source and the target Android devices in close vicinity. Turn on the Bluetooth feature on both Android devices and pair them by confirming the passcode. Now, go to the Messaging app on the source device and select the messages that you wish to transfer. Go to its Settings and choose to "Send" or "Share" the selected SMS threads. After that, you need to send SMS via Bluetooth. A list of all the available Android devices will be displayed. Simply tap on the target device to receive SMS messages. On the target Android, you will receive a prompt for the incoming SMS data. Touch "Agree" and start the SMS transfer process. As you can see, it can be tedious to learn how to transfer messages from Android to Android via Bluetooth. Not only is this SMS transfer method time-consuming, but it would also be complicated to implement as well. You may also be interested in Top 5 iPhone to Android transfer SMS ackup & Restore Another smart and easy way to transfer SMS from Android to Android is by using the SMS Backup & Restore app. Besides taking a backup of your Android messages and restoring them afterward, it can also perform a wireless SMS transfer. Unlike Bluetooth, this message transfer takes place via WiFi direct, which makes it a lot faster and reliable. The app is available for free and can be downloaded from Google Play Store. Therefore, before you begin, make sure that you have downloaded the SMS transfer app on both Android directly. Step 1: Launch the Android SMS transfer app on both the devices and choose to "Transfer" your messages. You can find "Transfer" on the home page of the app or under its Settings tab. Step 2: Now, you need to specify the source and the target Android device. On the source and the target Android device, tap on the "Send from this phone" button. Step 3: The target Android will wait for the SMS transfer. On the other hand, you can view a list of all the available devices on the source Android, you will get an invitation to connect. Tap on the "Accept" button to proceed. Step 5: Great! You are almost there. On the source Android, the app will provide an option to send a previous backup file or all the text messages and calls. Choose the relevant option and touch on the "OK" button. Step 6: Just wait for a while for the Android messages to transfer to the target Android phone. Conclusion: There you go! Now with the help of these techniques, vou can easily transfer SMS from Android to Android. Out of all these options, MobileTrans - Phone Transfer provides the fastest and most convenient solution, and Dr.Fone - Phone Manager makes Android SMS transfer more customized and flexible. You can simply go to its official website and give this freely available tool a try. It will let you move your data from one device to another without any hassle. Free Download Free D phone calls and chatting with social apps. Sometimes, we may need to do something with Android text messages after they disappear, etc. These are likely to drive us to come up with a query - where are texts stored on Android? Well, this page will shed light on the Android text message folder location, ways to back up and recover Android texts are generally in a database, which is in the data folder located within your device's internal memory. Android text history location may vary from phone to phone. And you can check it in accordance with your Android version: For Android 4.3 or earlier: /data/data/com.android.providers.telephony/database/mmssms.db. For Android 4.4 and higher: /data/data/com.android.providers.telephony/database/mmssms.db. For Android 4.4 and higher: /data/data/com.android.providers.telephony/database/mmssms.db. You can only check the text messages in the AQLite database folder on a rooted Android device?). The database is not readable, but you can open it with an SQLite viewer. Read Also: Part 2: How to Transfer Messages Stored on Android to Computer Messages located in the Android database are at risk of being lost due to various reasons. For safety, most of us would like to keep a copy of them on a computer. If you want to do the same, MobiKin Assistant for Android (Win and Mac) is your must-have tool. This program is made to fulfill the needs of Android users who wish to transfer, back up, restore, and take control over their Android data breezily. Main Features of MobiKin Assistant for Android: Transfer texts stored on Android to PC/Mac selectively or in batches, and vice versa. It also works for other Android SMS and other data. Manage your Android content on a computer without a hitch. Run smoothly on nearly all Android devices, like Samsung, Xiaomi, Motorola, Sony, Huawei, LG, OnePlus, OPPO, Vivo, Google, ASUS, etc. Get the job done well in an effortless manner without giving away your privacy. How to transfer SMS messages stored on Android to a computer via Assistant for Android? Step 1. Connect Android device to computer Start by downloading and installing the software on your computer. Link your Android phone to the PC through a USB cable. Then, you can refer to the on-screen prompts to make your device be recognized. Step 2. Preview and choose the messages for backup On the main interface, click the "SMS" category at the left menu. After that, preview and select the text messages you want to transfer from the right pane. Step 3. Export text messages from Android to computer. Video guide on how to export Android contacts to computer: Part 3: How to Back Up Text Messages on Android Making use of SMS Backup & Restore, a free app, you can take a backup of your Android text messages and save them locally. This app is compatible with Android devices running Android devices running Android text messages and save them locally. This app is compatible with Android devices running Android text messages and save them locally. This app is compatible with Android devices running Android text messages and save them locally. This app is compatible with Android devices running Android text messages and save them locally. creating a new backup. From here, you can choose what info you want to save and where to store the backups. You can save the emojis attached to the SMS. Name the backup files and store them locally. You can also automate the process by going to Settings > select the hamburger menu at the upper-left corner and follow the prompts to do the rest. Where are Android text messages stored on your Android phone after making the backup with SMS Backup & Restore? Well, when you decide to save the texts directly to your phone, this app allows you to store them on Android SMS location as either "Default app folder" or "Your own folder". Extended Reading: Part 4: Where Are Deleted Text Messages Stored on Android Where are SMS text messages stored on Android file system after you get them deleted? Well, these text messages won't disappear from your Android phone at once. Actually, they are still on the phone's internal memory, but the allocation of the data is removed by the File Allocation Table. And the memory they occupy will be freed up for use by other files. As we know, there is no recycle bin on Android devices to recover deleted files directly. Thus, if you delete the text messages or lost them for some unknown reason, it's not easy to retrieve them quickly. Yet, you can stop using your Android phone immediately after losing the content and then find a trusted 3rd-party software to retrieve them with the least possible delay. Keep on reading the part 5. Part 5: How to Recover Deleted Text Messages Stored on Android Phone We can't stand to lose a portion of the valuable messages on Android phones. But what happens in real life is often out of our control. SMS loss is among many kinds of dilemmas. If you are struggling with the situation now, just take a glance at MobiKin Doctor for Android (Win and Mac). This is a professional and advanced program, helping Android users to recover overall deleted/lost data from Android internal memory and SD card, including SMS, contacts, call logs, photos, videos, music, documents, etc. It lets you preview and select the recoverable and existing Android texts with MobiKin Doctor for Android? Install the program on your computer after the download. Launch the tool and link Android to the computer via a USB cable. Enable USB debugging on Android device to let the phone detected by the software. Mark Messages on the pop-up screen. Tap "Next" and follow the hints to trigger the scanning procedure. After the scanning, view and choose your desired text messages. Click "Recover" to save them onto your computer. (Learn how to recover SMS from a broken Android Phone?) Bonus: Where Does Android Phone Store Pictures from Text Messages? MMS (Multimedia Messaging Service) often consists of text messages, photos, audio. They are stored in the Android data folder on your phone's memory as well. OK, here's a question: what's the location of the pictures and other attachment, Download Attachment, Download Attachment, Download the pictures to the "Download" folder on your SD Card. Go to your Android gallery to check the pictures there. Final Words This post mainly focuses on "where does Android phones, the recovery method of deleted texts, and where's the MMS pictures folder. Now, you can refer to the corresponding measures or download relevant software to take on tasks as per your needs. Lastly, please drop a line in the comment box below if you have any questions or suggestions. And we will be happy to help you out soon.
