Myers David Myers received his B.A. in chemistry from Whitworth University, and his psychology Ph.D. from the University of Iowa. He has spent his career at Hope College, Michigan, where he has taught dozens of introductory psychology sections. Hope College students have invited him to be their commencement speaker and voted him "outstanding professor." His research and writings have been recognized by the Gordon Allport Intergroup Relations Prize, an Honored Scientist award from the Federation of Associations in Behavioral & Brain Sciences, an award for Distinguished Service on Behalf of Social-Personality Psychology, a Presidential Citation from APA Division 2, election as an American Association for the Advancement of Science Fellow, and three honorary doctorates. With support from National Science Foundation grants, Myers' scientific articles have appeared in three dozen scientific periodicals, including Science, American Scientist, Psychological Science, and the American Psychologist. In addition to his scholarly writing and his textbooks for introductory and social psychology, he also digests psychological science for the general public. His writings have appeared in four dozen magazines, from Today's Education to Scientific American. He has authored five general audience books, including The Pursuit of Happiness and Intuition: Its Powers and Perils. And he blogs about psychology and life at TalkPsych.com. David Myers has chaired his city's Human Relations Commission, helped found a thriving assistance center for families in poverty, and spoken to hundreds of college, community, and professional groups worldwide. Drawing on his experience, he also has written articles and a book (A Quiet World) about hearing loss, and he is advocating a transformation in American assistive listening technology (see HearingLoop.org). For his leadership, he has received awards from the American Academy of Audiology, the hearing industry, and the Hearing Loss Association of America. David and Carol Myers met and married while undergraduates, and have raised sons Peter and Andrew, and a daughter, Laura. They have one grandchild, Allie. Nathan C. DeWall Nathan DeWall is professor of psychology at the University of Kentucky. He received his bachelor's degree from St. Olaf College, a master's degree in social science from the University of Chicago, and a master's degree and Ph.D. in social psychology from Florida State University. DeWall received the College of Arts and Sciences Outstanding Teaching Award, which recognizes excellence in undergraduate and graduate teaching. The Association for Psychological Science identified DeWall as a "Rising Star" early in his career for "making significant contributions to the field of psychological science." He is in the top 1 percent of all cited scientists in psychology and psychiatry on the Institute for Scientific Information list, according to the Web of Science. DeWall conducts research on close relationships, self-control, and aggression. With funding from the National Institutes of Health, the National Science Foundation, and the John Templeton Foundation, he has published over 200 scientific articles and chapters. DeWall's research awards include the SAGE Young Scholars Award from the Foundation for Personality and Social Psychology, the Young Investigator Award from the International Society for Research on Aggression, and the Early Career Award from the International Society for Self and Identity. His research has been covered by numerous media outlets, including Good Morning America, The Wall Street Journal, Newsweek, The Atlantic Monthly, The New York Times, The Los Angeles Times, Harvard Business Review, USA Today, National Public Radio, the BBC, and The Guardian. He has lectured nationally and internationally, including in Hong Kong, China, the Netherlands, England, Greece, Hungary, Sweden, Australia, and France. Nathan is happily married to Alice DeWall and is the proud father of Beverly "Bevy" and Ellis. He enjoys playing with his golden retriever, Finnegan. As an ultramarathon runner, he completed numerous races, including the Badwater 135 in 2017 (dubbed "the World's toughest foot race"). In his spare time now, he writes novels, watches sports, and plays guitar and sings in local rock bands. Loading PreviewSorry, preview is currently unavailable. Myers is the book author. The author has lifelong experiences of research on psychological science. In addition to it, C. Nathan DeWall is the special contributor to this very text. Exploring psychology by Myers has its own ways of transferring information to the readers. The contents of book are however somewhat similar to other popular books on Psychology. Exploring Psychology 11th Edition Exploring Psychology contains 15 chapters. The book starts with a detailed introduction of Psychology. The need of studying psychology and the experimental methods make the first chapter. This is followed by a chapter named as "biology and behavior". As we know our biological systems have key roles in producing our behaviors. Brain and hormonal systems directly influence behaviors. So, an understanding of the functioning of these biological structures is of prime importance. At the same time, book contains elements of genetics and evolution. Then there is an explanation of the states of human mind. There is an elaboration of Dreams, consciousness and other related processes in the book. 4th chapter covers developmental Psychology. You should also read "Psychology Themes and Variations". Moving forward there are some core chapters which are common in every book on psychology. Examples are sensation, perception and motivation etc. Similarly, there is an efficient discussion about human personality and intelligence in exploring psychology. Social Psychology has also gained much importance in the changing world. So, Exploring Psychology 11th edition pdf has an excellent portion on social psychology. Last two chapters of the book circle around psychological problems. A detailed overlook of psychological disorders is also there. Along with this, present day therapies are discussed in the light of modern research. The writing style of the text attracts the reader's attention. Similarly, Colorful representation of figures and examples are a key in depicting the core knowledge. Also, the important definitions come side by the topics. So, students can easily make their notes. In short Exploring Psychology 11th edition is worth reading book. It is a source of knowledge to a wide variety of readers.
